Our Ref: MJA/11099/00170/PFI

Dear Sirs

High Speed Rail (Crewe - Manchester) Bill - Second Additional Provision
Petition Number - AP2-057
Your Petition - Right to be Heard

The right to be heard

As you may know, in order for their petition to be heard as of right, petitioners must be able to show the Select Committee that their property or interests are directly and specially affected by the Second Additional Provision to the High Speed Rail (Crewe – Manchester) Bill (“AP2”). The House of Lords Select Committee on the Phase One Bill encapsulated it in the following way:

“...an individual petitioner’s right to be heard as a right...depends on that petitioner establishing the prospect of direct and material detriment to his or her property interests, either by compulsory acquisition or by interference with his or her property rights which amounts to a common law nuisance, or some other interference which would be actionable if not authorised by Parliament.”

The Select Committee may also, at its discretion, hear petitions from certain types of representative bodies and also from inhabitants of areas adversely affected by AP2 who are sufficiently representative.

The Select Committee procedure allows the Promoter – the Secretary of State for Transport – to object to a petition being heard on the basis that it does not demonstrate a special and direct effect on the petitioner’s property or interests and either that the Committee does not have a discretion to hear the petition or that, if there is such a discretion, it should not be exercised in that particular case. This is known as a “right to be heard” challenge (it was previously known as a “locus standi challenge”). More information is given in the enclosed Promoters’ note *“The Right of Petitioners to be heard by the Commons Bill Committee”* and the guidance note on the right to be heard procedure.

A full version of the precedents which are summarised at Appendix 2 of the Promoters' Note *The Right of Petitioners to be heard by the Commons Bill Committee* can be found following the link below.

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/1065885/HS2_documents_referred_to_in_note_of_promoters_position.pdf

Parliament's website includes guidance called "Guidance on right to be heard", which gives examples of petitions which are, or are not, likely to be heard by the Committee. A link to the guidance is set out below.

<https://committees.parliament.uk/committee/597/high-speed-rail-crewe-manchester-billselect-committee-commons/publications/13/engagement-document/>

How this affects you

In light of the above the Secretary of State, as Promoter, has decided to object to your petition being heard. We therefore enclose a formal notice of objection to your petition.

The challenge before the Select Committee

There is a set procedure for right to be heard challenges which you – and the Secretary of State as Promoter – will have to comply with. Details are set out in the enclosed guidance note on the right to be heard procedure. You need to read that note in full as it affects your rights.

Attendance at the right to be heard challenge hearing

You need to attend the right to be heard challenge hearing in person or arrange for an agent to represent you. The hearing will be heard in person unless the Select Committee decide otherwise in exceptional circumstances. The rules provide that if you decide not to attend or be represented, the Promoter's objection will be upheld. This would mean that your petition would automatically not be heard or considered by the Select Committee.

The Select Committee will be in touch shortly to let you know the date on which the right to be heard challenge to your petition will be dealt with.

Yours Sincerely

Winckworth Sherwood LLP

HIGH SPEED RAIL (CREWE – MANCHESTER) BILL

SECOND ADDITIONAL PROVISION

Notice of Objection

to the

right to be heard

of

Free Hale and Hale Barns of HGVs

The Secretary of State intends to object to the above named Petitioner to be heard by the Select Committee of the House of Commons on their Petition against the Second Additional Provision.

As a general rule, petitioners only have the right to be heard by the Committee if they are able to show that their property or interests are directly and specially affected by the Second Additional Provision and therefore that they may suffer particular adverse effects beyond those felt by the public at large.

The Secretary of State intends to make his objection for the following reasons:

1. The Petitioners do not allege that they own or occupy land within the limits of the Second Additional Provision as shown on the Second Additional Provision plans nor do they allege that they have a property interest (for example, a right of way) which is affected or interfered with by the Second Additional Provision.

Therefore the Petitioner does not show that the Petitioners' properties and/or interests are directly and specially affected by the Second Additional Provision.

The Petition does not state nor show that it has been submitted by the authorised agent of specified persons whose property or interests are directly and specially affected by the Second Additional Provision as mentioned above.

It is understood that those Councillors named in the Petition are elected Trafford Councillors for the Hale Barnes and Timperley South Ward. The Committee has a discretion under Standing Order 96 to allow the local authority of an area which is adversely affected by the Second Additional Provision to be heard. However, Standing Order 96 does not extend to an individual Councillor; and the inhabitants of the area for which those signatories to the Petition are elected Councillors are sufficiently represented by Sir Graham Brady MP and Trafford Council who have petitioned against the Second Additional Provision and whose petitions have not been challenged by the Promoter. Further it would be inappropriate for the Committee to exercise its discretion to hear the Petitioners as representatives of the inhabitants of the area as the issue of construction traffic route(s) is more properly raised by the local highway authority.

In addition, the points made in the Petition in relation to potential impacts relating to the use of certain roads as a construction traffic route within Hale and Hale Barns are also made in the petitions of Sir Graham Brady MP and Trafford Council who represent the area alleged to be adversely affected by the Second Additional Provision and whose right to be heard is not being challenged by the Promoter.

2. Under Standing Order 95 the Committee may allow a society, association or other body, sufficiently representing business or interests, including amenity, educational, travel or other recreational interests, to be heard if that body shows that the interests they represent will be adversely affected to a material extent by the Second Additional Provision.

The Petition shows that Free Hale and Hale Barns of HGVs is a group of residents from the Hale, Hale Barnes, and nearby areas. The Petition also shows that the group was set up to oppose the Second Additional Provision of the High Speed Rail (Crewe – Manchester) Bill rather than being an established society, association or body representing the interests of inhabitants.

The Petition does not therefore show that the Petitioner is a society, association or other body which sufficiently represents any amenity, educational, travel or recreational interests affected by the Second Additional Provision.

The Petitioners have not therefore shown that they have a right to be heard nor that Standing Order 96 applies. In addition the Petitioners have not shown that they should be allowed to appear under Standing Order.95.

DATED 05 SEPTEMBER 2023

2. Petitioner information

In the box below, give the name and address of each individual, business or organisation submitting the petition. Please note that addresses here will be provided to the Bill's promoter, but will be redacted in the version of the petition published on the Parliamentary Website.

Free Hale and Hale Barns of HGVs

In the box below, give a description of the petitioners. For example, "We are the owners/tenants of the addresses above"; "My company has offices at the address above"; "Our organisation represents the interests of..."; "We are the parish council of..."

Your Petitioner, "Free Hale and Hale Barns from HGVs", is a collective of residents from the Hale, Hale Barns, and nearby areas, who have come together for the specific purpose of making this petition in respect of elements of the second additional provision to the Bill ("AP2"). The names of the over 1300 individuals who have given their names in support of this group are set out at **Annex A** to this petition, provided separately to the Committee.

The group includes all three elected councillors for the Hale Barns and Timperley South Ward - Cllrs Nathan Evans, Dylan Butt, and Michael Taylor.

3. Objections to the Second Additional Provision to the Bill

In the box below, write your objections to the Second Additional Provision to the Bill and why your property or other interests are **directly and specially affected**. Please number each paragraph.

Only objections outlined in this petition can be presented when giving evidence to the Committee. You will not be entitled to be heard by the Committee on new matters not included in your written petition.

1. AP2 includes provision for construction traffic to/from the River Bollin East Viaduct satellite compound to be routed through five residential roads in Hale Barns, namely Sunbank Lane, Chapel Lane, Longsides Road, High Elm Road and Hale Road (the A538), for the purposes of construction works (the “**Hale Barns Construction Route**”), with Sunbank Lane requiring significant widening to allow the passage of such traffic. The proposed routing will occasion serious consequences for Hale and Hale Barns. Alternative routings are available which would avoid such consequences. It is believed that the alternatives would not involve material, or possibly any, additional costs.
2. The area immediately surrounding the Hale Barns Construction Route comprises 2,000 houses. Annex A, provided separately to the Committee, lists over 1,300 people from the affected areas.
3. Supplementary Environmental Statement 2 and Additional Provision 2 Environmental Statement estimates that “*an average of*” up to 270 Heavy and Large Goods vehicles, Light Goods vehicles and cars will make “*combined two-way trips*” through the Hale Barns Construction Route per day.¹ This is highly damaging. Further, HS2 confirm that AP2 will create moderate and major new adverse effects on pedestrians and cyclists and major new adverse effects on traffic congestion in this area.²
4. Additionally, in the period prior to the current Sunbank Lane overbridge being closed and replaced, there is nothing to stop traffic from both the River Bollin East Viaduct satellite compound and the Sunbank Lane satellite compound using the Hale Barns Construction Route and/or other local roads, exacerbating the issues identified in this Petition. The consequence is a potential for more than 1,360 two-way total vehicle trips per day (1,090³ plus 270), which is unrealistic, and would cause yet further severe consequences.⁴
5. The local road system, including the Hale Barns Construction Route, comprises residential roads, unsuited to even low or moderate volumes of Heavy, Large and Light Goods vehicles traffic. Your Petitioner has intimate knowledge of these roads

¹ See Table 35, *Supplementary Environmental Statement 2 and Additional Provision 2 Environmental Statement*, River Bollin East Viaduct satellite compound

² Plan TR-03-321 Effects TS06-45-MA, TS06-46-MA, TS06-43-MO, TS06-47-MO, TS06-49-MO, TC06-35-MA

³ Ibid; Sunbank Lane satellite compound

⁴ See also Table 36, *Supplementary Environmental Statement 2 and Additional Provision 2 Environmental Statement*; Section 7.3 of *MA06 Volume 2: Community Area Report*

and believes that this proposal would result in unsafe and impassable roads for residents and construction traffic alike, with significant congestion and widespread disruption. HGV drivers will naturally seek out the quickest routes. Consequently, the proposals affect many more residents than those living on the Hale Barns Construction Route itself.

6. This was originally underlined by the MA06 Community Area report which states at paragraphs 7.5.10, 7.7.11 and 7.9.8 that construction traffic will also affect approximately 260 residential properties on several other roads in Hale. Specifically, it is stated that:

“Changes to the sound, noise and vibration assessment as a result of new construction traffic data have resulted in a new significant traffic noise effect on approximately 260 residential properties on Arthog Road, Bankhall Lane, Hawley Lane, Broad Lane, Chapel Lane, High Elm Road and Elmridge Drive, during peak months of construction. This significant traffic noise effect will combine with significant HGV traffic effects. Together these noise and HGV traffic effects will result in a new moderate adverse in-combination effect on amenity for residents at these properties, which is significant.”⁵

Paragraph 7.9.9 states that these dwellings will be affected by “additional construction vehicles using sections of this route and additional traffic diverting away from nearby construction routes.”

7. This construction traffic is not shown on any of the relevant maps. HS2 have latterly clarified by e-mail dated 14 August 2023 that - rather than the disruption referenced being due to in part to HGV traffic effects - such effects would be due to local traffic diversions resulting from construction works:

“During the later stages of construction, increases in traffic flows are forecast on a number of local roads in the Hale/Bowdon area, including on Bankhall Lane and Arthog Road. These increases would be due to the additional HS2 construction traffic associated with the Manchester Airport High Speed station and the ongoing construction works associated with the reconfiguration of M56 Junction 6, which would cause some local traffic from the Hale Barns/Hale area that was previously using Junction 6 to access the M56 to use Junction 8 (Bowdon Roundabout) instead.”(emphasis added)⁶

8. Your Petitioner is concerned that this ‘diversionary effect’, recently conceded by HS2, will nevertheless include HGV traffic as stated in paragraph 7 above, as well as local traffic. This will be significant and highly damaging.
9. At the junction of Hale Road and High Elm Road (a key junction on the proposed Hale Barns Construction Route), there is already significant congestion at peak times for those wishing to access the M56 motorway for journeys on to Manchester, Stockport, the M60 ring road or Chester or to proceed under it to Wilmslow. Hale Road is a key transport corridor. It is a key bus route used by local

⁵ See paragraph 7.5.11, MA06 Community Area report

⁶ Email from Jayne Willetts (HS2) to Cllrs Nathan Evans, Dylan Butt and Michael Taylor dated 14 August 2023.

residents and several school buses. Further overloading is another indicator of the likelihood of significant transport displacement as vehicles, including construction traffic, seek alternative routes.

10. High volumes of traffic will result in disproportionate increases in both noise and vehicle emissions pollution in a heavily populated residential area, which also includes two primary schools, a secondary school, and a care home. Your petitioner is highly concerned as to the dangers of construction and diverted traffic on the safety of children and other pedestrians in close proximity to the proposed Hale Barns Construction Route.
11. Your Petitioner is concerned that traffic displacement will also affect emergency vehicle traffic such as police getting to/from the M56/M60, and ambulances needing to reach the nearby Wythenshawe Hospital, South Manchester's main emergency hospital.

4. What do you want to be done in response?

In the box below, tell us what you think should be done in response to your objections to the Second Additional Provision to the Bill. You do not have to complete this box if you do not want to.

You can include this information in your response to section 3 'Objections to the Second Additional Provision to the Bill' if you prefer. Please number each paragraph.

12. In proposing these solutions your Petitioner refers to the undertakings made by HS2, namely that:

- a. Excavated material will be moved along the construction corridor of the proposed scheme where this is reasonably practicable. For longer distances or when it is not reasonably practicable to use the construction corridor, excavated material will be transported by public highway along designated construction routes. Where reasonably practicable, rail has been considered for the transportation of large quantities of excavated material over long distances; and
- b. HS2 will require its contractors to ensure the best practicable means to minimise the effect of the construction site on the local environment.

13. Your Petitioner also makes these proposals mindful of minimising the ecological and environmental impact of construction, and considers that the proposals below accord with HS2's environmental commitments to a greater degree than the proposed Hale Barns Construction Route.

14. The Hale Barns Construction Route should not be implemented. HS2 should be required to revert and reconsider the alternative "M56 Junction 6 proposals".⁷ However, your Petitioner makes the following in principle proposals and would be happy to provide further detailed submissions on potential alternatives.

- a. That the requirements to connect the planned construction compounds accessed by the proposed Hale Barns Construction Route are instead accommodated south/east of the M56 motorway, removing the need to route construction traffic north/west of the M56 motorway entirely. Excavated material should be moved along the construction corridor of the proposed construction site, rather than through the residential areas to the north/west of it. In light of the undertakings referred to above, the base of the rail track route (prior to rails being laid) may be best used for this purpose.
- b. That there is temporary use of capacity within non-residential land areas entirely outside and south/east of the Warburton Green Estate

⁷ These are set out in volume 5: Appendix CT-003-00HS2 Alternatives Report (HS2 Supplementary Environmental Statement 2 and Additional Provision 2 Environmental Statements). Proposal TB-10 should be reconsidered as necessary to accommodate the objections of your Petitioner.

such that there is no need to route HGV traffic through the proposed Hale Barns Construction Route.

- c. The route of the new slip road from A538 Wilmslow Road to the M56 gyratory meets the gyratory at Sunbank Lane, where it is due to be closed. Subject to the relevant elevations, it may be that construction traffic could transit towards this point and join the M56 or the A538 via the gyratory dependent upon whichever slip roads are available at the time.
- d. That a temporary haul route is constructed from either:
 - (i) near the existing Amazon facility via Sunbank Lane to the Sunbank Lane overbridge; and/or
 - (ii) the River Bollin East Viaduct satellite compound via Sunbank Lane;

and on to the new westerly M56 slip road, so that HGV and LGV traffic is transited onto the M56 and thus avoiding the affected Hale Barns residential roads entirely.

- e. A physical restriction be added at the end of Chapel Lane at its junction with Bankside, to prevent HGV traffic accessing Chapel Lane and the wider local road network.

15. Further, we are aware of other solutions put forward by the nearby Tatton Estate that should also be included in any review by HS2.

16. Further, and if the suggestions above are unacceptable:

- a. A full public consultation should be carried out to all affected residents in the area, both direct and indirect, outside the summer months, and following a reasonable notification period, before HS2 are permitted to impose the Hale Barns Construction Route. Such a consultation will have as its object the identification of workable and lawful mitigation for the disruption and effects consequent upon AP2 to local residents. No such consultation has yet been undertaken and HS2 have refused when offered to take opportunities to engage with local residents affected.
- b. Strict air pollution limits should be put in place which, if breached, would have the effect of mandating HS2 to divert construction traffic outside the Warburton Green area, and away from the proposed route. In particular, conservative limits should be put in place around school sites.
- c. Time-limited windows around non-peak traffic times, based on real-time traffic surveys, should be put in place for the use of the Hale Barns Construction Route.

d. HS2 should be required to particularise what additional funds will be made available:

- i. For the upgrade of local highways, and which local highways specifically;
- ii. For compensation of local residents and businesses for losses consequent on the proposals;
- iii. For a hypothecated fund for the purposes of remediation of civic and other buildings damaged by high volumes of construction traffic.

17. Finally, and in any event, your Petitioner requests that HS2 should not be permitted to move ahead with the Hale Barns Construction Route element of AP2 without a detailed real-time assessment of traffic at peak times on all roads affected, together with an assessment of pollution (including noise pollution) effects, and impact on the structural integrity of local buildings and the highways affected.

ANNEX A

**INDIVIDUALS WHO HAVE GIVEN THEIR NAMES IN SUPPOPT OF THE
"FREE HALE AND HALE BARNS FROM HGVs" GROUP**

Total Number of Petitioners listed	1,371
