Dear Sir Geoffrey, Emily and Sarah

I am writing to notify you of a new UK guarantee of \$280m (£210m) that the Foreign Commonwealth and Development Office (FCDO) is proposing to make to the Asian Development Bank's (ADB's) Innovative Finance Facility for Climate in Asia and the Pacific (IFCAP).

IFCAP is a mechanism developed by the ADB that aims to unlock up to \$11bn of new climate finance for developing countries in the Asia-Pacific region. The additional climate finance unlocked by IFCAP will help to mitigate carbon emissions in some of the highest-polluting countries globally, and support resilience to natural disasters in the most climate-vulnerable populations.

Through IFCAP, the UK and other development partners (including the US, Japan, Korea, Sweden and Denmark) will contribute a combination of guarantees and grants to the ADB (the UK will only provide guarantee support), which will unlock new climate lending from the Bank.

For the UK guarantee, the maximum total payout over its lifetime would be \$280m (£210m), and the annual estimated payout for IFCAP is £6m per year over the 25-year lifetime of the guarantee.

UK guarantees enable the Multilateral Development Banks (MDBs) to increase lending beyond the amount their credit policies would ordinarily allow. By protecting the ADB against the risk of non-payment on some of its loans, the UK guarantee enables the Bank to take more risk and make more investments. One of the recommendations of the G20 Independent Review of Capital Adequacy Frameworks is to make greater use of guarantees to expand MDB lending.

IFCAP adds to FCDO's growing portfolio of MDB guarantees. Since COP26, the UK has announced guarantees that will unlock more than \$6bn of additional MDB finance for African, Asian and Pacific countries. This has positioned the UK as a leader in using guarantees to unlock MDB finance. This leadership has had a demonstration effect, with other guarantors, including Japan and the US, now committing MDB guarantees for the first time.

UK contingent guarantees have no upfront cost (except administration costs). ODA budget is only required if there is a default on a guaranteed loan and the UK is required to pay out. The chance of a default on a MDB loan is significantly reduced by the MDB's Preferred Creditor Status.

The previous Government approved the Business Case for this guarantee and the UK guarantee was announced at the UN Sustainable Development Goal (SDG) Summit in New York in September 2023. I have given my approval for this guarantee to go ahead, subject to parliamentary processes being completed. HM Treasury has also approved the proposal.

Please raise any questions or objections by 7 November. Final approval to proceed with incurring the liability will be withheld pending an examination of any objections.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'Anneliese Dodds', with a long horizontal flourish extending to the right.

Anneliese Dodds MP
Minister of State for Development, FCDO
