Subject: Savings and productivity benefits from digitisation of public sector services

Dear Peter,

Thank you for your department's submission to the Science, Innovation and Technology committee's digital centre of government inquiry. We have begun taking oral evidence and look forward to hearing from DSIT Ministers and officials in due course.

In order to inform our ongoing inquiry, I would be grateful if you could provide a full breakdown and details of the methodology that helped your officials produce the estimate contained in the State of Digital Government Review, that "over £45 billion per year of unrealised savings and productivity benefits" could be achieved "through full potential digitisation of public sector services".

I would be grateful if you could respond by Friday 11 April. I intend to place a copy of this letter in the public domain.

Thank you for your continued engagement with the committee's work.

With best wishes,

Chi Onwurah MP
Chair – Science, Innovation and Technology Committee
