

GENDER RECOGNITION ACT

I feel this act should not be changed as the law as it stands does not need to be change as this is a distortion of how God designed men and women and would make the situation far worse as most of these people are suffering form a psychological problem and if they change there mind at a later date it would make the situation even worse in situations where they have had operations to change there bodies. There is also the danger of giving sexual predators unrestricted access to facilities to the opposite sex.

November 2020.
