Written evidence from Mr Lesley Hutchings (COV0080)

As you are aware, human rights are of utmost importance. It has been too easy in the past to see the introductions of new laws and treaties, which are then subverted for use in oppressive measures. A prime example is the Mutual Legal Assistance Treaty. This has the appearance of being an anti-terrorist act, which is commendable of course. But following its introduction, there are instances such as Lynda Thyer who remains in a French jail (9 months and counting) with no trial or charge for the “crime” of finding a cure for cancer (exercising her human right to work, in a profession that should be exalted, not criminalised), Julian Assange who remains in a UK jail after his jail time ended for breaching bail. with no trial or charge for the “crime” of writing the truth about the USA Government (exercising a journalists right to freedom of speech and upholding the electorate's right to know what our Governments are doing).

The clear picture for all watching the developments of further acts of parliament is that the lobbying (aka bribes) hold far too much power. We are seeing more and more degradation of human rights, hard fought for and hard won, in order to appease institutions and corporations. These COVID measures are being rushed through, without stopping to think. When the population acquires herd immunity from this, there will be no need for Government intervention. We are being denied the opportunity to acquire immunity via natural means (98% of those who get it have flu symptoms, that’s all). Instead we are being told that a man made vaccine will be better and to stay indoors until this is ready. This is illogical, but shows the power of lobbying in Government.

It is the elderly and vulnerable who should be isolated, until the population has acquired herd immunity and the virus has died out. I am guessing you have seen the article in the BMJ that states those who have received the flu vaccine are more likely to die. This may explain why it is hitting hard in the elderly and NHS staff populations - both of these groups have the flu shot annually.

We do not need mandatory medical procedures, in violation of the Nuremberg treaty (in order to sell more vaccinations).

We do not need surveillance in violation of our right to a private and family life (in order to track and trace those who have not received vaccinations)

We do not need children torn from their loving family homes because their parents disagree with a pharmaceutically led GP surgery on the subject of vaccinations (violation of right to family life)

We do not need confinement in violation of our right to freedom of movement and work (in order to bully people into accepting a dangerous medical procedure)

We do not need our right to organise and protest being made illegal.

You, more than anyone, know the importance of human rights. Do not allow this pandemic to become the catalyst for oppression and loss of human rights. Do not allow our Human Rights to be attacked, watered down, diverted or destroyed in any way on the basis of a man
made, planned pandemic. That will be giving them exactly what they want. If you give an inch, those who can will take a mile. As seen in the cases of Julian Assange and Lynda Thyer.
