

**Written evidence, Institution of Civil Engineers**

The Institution of Civil Engineers provided a full and considered response to the Law Commission's Consultation Paper on Technical Issues in Charity Law and we were pleased with their Report (Law Com No 375) and the Government response.

We are delighted that the vast majority of the Report's 43 recommendations have been accepted and we understand the Government/Privy Council response to the recommendations they have either partially accepted or decided not to take forward.
