

Written evidence from Anonymous (HCS0038)

██████████, my mother has been in a residential care home since March 2020 she has dementia.

The care home my mother is in has a visitation rule of 2 ½hr visits a week on certain days and times No evening or Sunday visitation

Pre booked visits only

No children or pets are allowed to visit

Only 2 visitors allowed.

No ECG status recognised, I have been fighting for 2 months to be allowed to be my mother's essential carer

I am submitting this evidence in hope that the abuse of human rights is never repeated in care homes again, and that families are never forcibly kept apart like they have been during this epidemic.

The Human rights Issue of article 8 needs to be addressed.

THE RIGHT TO FAMILY LIFE IS BEING ABUSED.

Care homes are choosing not to follow government guidelines, blanket bans on ECG Status, and visitation rights.

Government guidelines on care home visitation need to be made law otherwise Care Homes will continue to abuse the human rights of people under their care.
