

Written evidence submitted by Greater Manchester Health and Social Care Devolution [DEV 056]

Further to my appearance at the Communities and Local Government Select Committee on 10th November, please find attached a further briefing in relation to Specialised Services.

This has been prepared by Gina Lawrence, Chief Operating Officer, NHS Trafford Clinical Commissioning Group.

I hope this is helpful to the Committee.

Please contact me for any further information you may require. Yours sincerely

Ian Williamson
Chief Officer
GM Health & Social Care Devolution

Briefing

By Gina Lawrence COO lead for specialist services on behalf of GM CCG s

Service distribution of specialised services under Devolution Manchester Background and rationale

All 180 services have been considered using a software system that allows each service to be triangulated and plotted on to a spider diagram to look at volumes of service provision and co-dependency. This has resulted in the services being allocated into 3 groups. Those that are required to have National direction and commissioning, those that need to be co-commissioned at regional level and those that can be commissioned directly at GM level:

This has then been reviewed by a multi-agency team and agreed through Greater Manchester 12 CCGs. This has then been validated through the NW specialist team and finally at National level

The groups are defined by the following set of principles

- Group 1(Greater Manchester)
 - These services are considered discrete
 - Inter-dependency are not significant
 - Work on a GM footprint
 - Population base of 3 million people
 - Services can sit within a GM construct
 - Services within this group will be considered for early transformation

- Group 2 (Regional)
 - More appropriate to be commissioned on a wider than GM footprint
 - Profile means difficult to split service
 - Large net importer from other areas

- To be managed jointly by Devolution Manchester with other NW CCG's under the guidance of the NW Spec Commissioning Team
 - AGG under Devolution Manchester would offer high level input
 - These services have an opportunity in future to move into full commissioning within Devolution Manchester

- Group 3 (National)
 - Highly specialised services
 - Small number of patients
 - One/two centres in the Country
 - Input from National Team
 - To be managed by NW Specialised Commissioning with input by National Team
 - AGG to have oversight of budgets/activity/performance/quality issues

Greater Manchester –Group1
